Re: District Assessment Plan and Scantron

Date: June 10, 2011

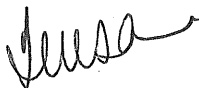

One of the recommendations from KLN was to create a cohesive assessment plan for the district. Through the year, we worked with the MTSS District Team to create that plan.

One of the missing pieces had to do with the common assessment plan at the secondary level. Being mindful of budget considerations, the recommendation was to move away from NWEA MAPs assessment and to utilize those funds to support the adoption of Scantron. The Scantron Performance Series is an adaptive assessment that directly replaces NWEA MAPs. The Scantron Achievement Series provides management of the common assessment data at the secondary level.

Attached is the District Assessment Plan and the quote from Scantron.

If you have any questions, please contact me at ttosh@usd261.com or 554-2205.

Thank you!

USD 261 District Assessment Plan
