Dear Parents/Guardians:

The Haysville School District is working closely with the Sedgwick County Health Department, the Kansas Association of School Boards and the Kansas Department of Health and Environment to provide up-to-date information to our staff, students and parents about the prevention of swine flu.

We have posted information on the USD 261 website that will be helpful to the families of our students and employees. Haysville School District is doing everything possible to protect the health of our students and staff and limit the spread of this illness.

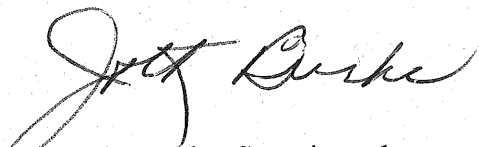

Mary Carr, District Nurse, has daily communications with the nurses/health aides in our schools to monitor illness trends within the district.

Carr has been in contact with the principals and directors of all our facilities to reinforce steps to help prevent the spread of swine flu. An e-mail was sent to all employees with guidelines about hand-washing, the covering of the nose and mouth when coughing or sneezing and the avoidance of touching eyes, nose and mouth.

Our top priority is the health and well-being of our students and employees and we are doing everything possible to address the situation. Please feel free to contact the nurse/health aide in your child's school if you have any questions or concerns.

Additional health information about the swine flu can be found at the USD 261 website at www.usd261.com/district/dnewsletters.htm

Sincerely,

Dr. John Burke, Superintendent
